

# Test Bench for solenoid valve SB 23

- 1. Test sample**      Mobile valves SB 23
- 2. Purpose**            Function check of the valves
- 3. Design**
  - Self-supported computer controlled test bench
  - Automatic adaptation and clamping of test samples
  - Fast conversion by exchange technique
  - Compact setup
  - Flexible operator´s interface
  - Digital display of the measuring values
  - Display of the performance maps
  - Test sequence with free parameter setting
- 4. Measuring- and setting values**
  - Checking of the basic functions (slide valve, stop valve, pressure scale)
  - Checking of the sleeve force and travel
  - Checking of the rest position
  - Checking of the Kickout
  - Checking the shuttle change-over valves
  - Checking of the Prio Valve
  - Slide valve leakage
  - Load sensing-System
- 5. Options**            Additonal customer specific functions possible
